DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 are drawn to apparatus and method for driving display panel, classified in class 345, subclass 92.
 - II. Claim 12 is drawn to a recording medium to record a program that drives panel display, classified in class 369, subclass 116.
1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
The inventions are distinct, each from the other because of the following reasons:
 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention I, claims 1-11, requires apparatus and method for driving a display panel device in a reliable manner by utilizing a control device for properly taking action when abnormality detected in a driving unit while the invention II requires a recording medium for recording a program that drives a panel display device according to a control device in abnormal manner of power supply generating unit.
 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
